

OUR MISSION

As a family-owned company with around 60 years of experience in the field of electroplating and metal processing, we manage and live our company according to this guiding principle.

THE CUSTOMER IS OUR MAIN ASSET – accordingly we want to serve as readily accessible point of contact and with our extensive knowledge and experience and assist in choosing, developing and implementing of new systems. A flexible customer support is at IWG at the top of the list, therefore we are a solid and innovative industry partner.

WE MAINTAIN AN INTENSIVE RELATIONSHIP with our internal and external professional environment and strive together for constant optimization and tailor-made solutions. With major know-how and latest laboratory technology we set benchmarks for premium products and together we strive to achieve a healthy sustainable growth.

WE TAKE OUR RESPONSIBILITY TOWARDS ENVIRONMENT AND MANKIND SERIOUSLY because we want to preserve our earth for future generations. We use our energy and raw-material resources efficiently and economically and dispose our wastes according to the state of the art. Development of environmentally friendly products is corporate goal.

We pay special attention in all our activities to **CREATE SAFE AND HEALTHY WORKING CONDITIONS** in a modern and attractive working environment. We set standards that far exceed legal requirements and detect risks and possible safety hazards before they occur. With preventive and sustainable measures we are able to minimize the risk for humans and environment and improve constantly. The whole team is working in concert to make our processes and workplaces more safe and sustainable.
